MXWendler Stage Designer and FXServer Knowledge Base

MXWendler FXServer and Stage Designer serves the best video playout for Theatres, Facade Projections, Video Mapping, Architectural Lighting, Clubs, and LED Lighting. *This video software places a strong emphasis on the composition and positioning of the output, because the projection is just as important as the content - no space, stage or scene is like another.* It is a professional real-time video software, which works quickly, securely and robustly. The clearly laid-out interface makes it easy to use and easy to learn. The only limit is the user's imagination.

Getting started

- Read basics
 - Try a tutorial
 - Troubleshoot problems
 - Knowledge about video media and smooth video playback
-
